

Low Start Up Cost & No Minimum Card Reader Purchase

LOW Start Up Cost & No Minimum Card Reader Purchase

CryptoPay Credit Card System

The Most Secure and Cost Effective Choice for Adding Credit Card Acceptance at your Laundry!

CRYPTOPAY ADVANTAGES

CryptoPay Transaction Consolidation reduces your transaction fees.

Example: A customer visits your laundry and swipes her credit card to start the 55lb washer, and is charged \$6.00. Forty minutes later swipes her card again at the dryer, and is charged \$2.00. CryptoPay combines these two charges into one \$8.00 charge that is submitted to the credit card company. The result is only one merchant fee for the two purchases. Other systems would charge one fee for each separate purchase – twice the fees for one customer visit.

CryptoPay Wireless Credit Card Swipers reduces your installation time and cost.

CryptoPay Credit Card Security prevents credit card data from being 'in the clear' and at risk. This is accomplished by encrypting the credit card data at the moment, and point, of the credit card swipe. Encrypted data can only be decrypted by Magensa.net. Magensa.net is a PCI-DSS certified payment gateway. CryptoPay provides secure credit card processing that 'Simply Stops Fraud' at the point of credit card swipe.

Low Start Up Cost – no minimum quantities to purchase. Add swipers at your pace and budget.

“I chose CryptoPay for my laundromat after I looked at my other choices in the marketplace. I simply needed a device to take credit cards without any “extras” that would just confuse my customers. I also didn’t want to spend thousands of dollars for a simple credit card swiper. CryptoPay was exactly that! I love that to date I haven’t had a single issue with the operation of any machine. They’re great looking on my equipment, went in easily, and my customers love them. I like the simple reports that I look at on my smartphone. Processing through Worldpay is easy and they were real helpful in setting up my account. The guys at cryptopay were just as easy to work with and I couldn’t be happier! I also added them to my dog washes and will be adding them to my new location in a few months. I can’t imagine using anything else.”
