CryptoPay Remote Activation Service Now Available

The CryptoPay Remote Activation Service allows the car wash owner to remotely start (activate) a device connected to a CryptoPay Swiper through the MyCryptoPay Portal.

- Remotely activate a bay or vacuum. Choose the site and bay or vacuum to activate. Swiper will start and run for the configured time programmed in the swiper. [1]

- Remotely activate a CryptoPay compatible PayStation. [2,3] Customer chooses the wash price at the PayStation and then car wash owner sends the remote activation command to the PayStation.

Use Cases

- Car wash owner can provide a free wash to customer

- Car wash owner can compensate a customer who may have had a bad wash

- Equipment testing and service

[1] If swiper is configured for "Count Up" the remote activation will start the swiper until it reaches the max time configured or customer pushes the "Stop Button".

[2] CryptoPay compatible PayStations - Hamilton Gold Line, Hamilton ACW4/5, Unitec Wash Select II.

[3] Remote activation is not compatible with MDB Vending or MDB PayStations.
